

How to assemble your AMX35 Display Shelving from UNI-SHOP

1. Tools required: Spirit Level – 12mm Spanner – Hammer
2. Insert the base leg into the upright & knock into place with the hammer. (Bases fit into the larger holes at one end of the upright.)
3. Knock the oblong “metal” foot into the bottom of the upright and insert a glider foot into this followed by another at the front of the base leg.
4. Repeat this on all uprights & bases.
5. Next fit the back panels starting at the bottom and working upwards until all are in place.
6. Now fit the skirting board followed by the base shelf.
7. Check that the unit is level using the spirit level and spanner, firstly from left to right, followed by back to front.
8. Lastly, fit the accessories such as shelves etc..
9. Assembly is basically an easy operation but if at any stage you are unsure please do not hesitate to contact us.
